

## Installation Agreement For Above Ground Pool Installation

**By signing this agreement, you acknowledge that you have read and agree to the terms below with Hydra Hot Tubs & Pools LLC:**

- Installation includes building of the wall, frame, filter system, and installation of the liner. Water will be running in the pool when we are finished. Water is to be supplied by the customer with a water hose.
- Hydra does not: build or install the ladder/steps, run electrical to filter, landscaping or backfilling. Extension cords are not recommended. Depending on circumstances, for an additional charge, building the ladder and backfilling may be available.
- Any trees, stumps, rocks, etc.. are not considered normal grading. If you have anything not considered normal, there may be additional charges for the grading. These charges are to be paid to the grader and are not included in the original price. Pools are installed on level ground. For an additional charge, we can bury the pool to up to 2 feet into the ground. Anything deeper than 2 feet will void your warranty. Please confirm your requested depth at time of scheduling to avoid any issues during grading.
- Customer is responsible for all required permits and is considered the general contractor. We are strictly sub-contractors for the customer.
- Customer is responsible for disposing of all trash after installation.
- Hydra Hot Tubs & Pools LLC nor the grader are responsible for any damage caused by equipment during grading and installation. It is not recommended to build on top of septic lines or tanks. It is the customer's responsibility to communicate the locations of any sprinkler, electric, sewer, gas, or water lines and pipes. **Call 811 to have lines marked.**
- Most jobs will have sand delivered prior to installation. The grader will use as much as he can, but there will be residual. This will be the customer's responsibility to clean up. In most cases, grass will grow through the sand, or rain will wash it away.
- Grader needs to have a minimum of 8' for the bobcat. Any fence panels that need to be removed, and any vehicles that may need to be moved, should be moved prior to the grader's arrival. Installers also need to get their vehicles back to the pool site if possible. If the grader has to wait for vehicles to be moved or fence panels to be taken down for a significant amount of time, or has to take down a panel, extra charges to the grader may be applied. The grader or Hydra will not be responsible for putting the panel back. Also, if the grader has to wait to be paid his fee in cash for any reason, extra charges could apply. Please be prepared on installation day.
- Hydra Hot Tubs & Pools LLC has a 90 day warranty on installation. This warranty covers any problems related to workmanship. Not covered under warranty: complaints if the pool is within an inch of being level, if the sand base is not perfectly smooth or level, the presence of wrinkles caused by the liner being in the box, and issues due to your soil being soft or moist. If issues arise due to not backfilling the pool in a timely manner, the warranty is void.
- Hydra Hot Tubs & Pools LLC is not responsible for any replacement or reimbursement of any water for any reason. Customers are advised to add about 1 foot of water and let the liner sit for 24 hours, then check for leaks before filling the pool.
- If this is a pool replacement, or you have an existing deck, we will get the pool as close to the old footprint or new deck as possible, but we cannot guarantee a perfect fit. Expect to do deck or trim work.
- Hydra Hot Tubs & Pools LLC is not responsible for acts of nature, i.e. washout from rain or wind damage to pool.
- Final payment will be due upon completion of the pool. Completion will be once the liner is installed.
